Teaching Professionalism in Abortion Care

Jody Steinauer, MD, MAS
Professor of Obstetrics, Gynecology and Reproductive Sciences
University of California, San Francisco
Teaching Professionalism

• Challenge learners to develop
  – Self-awareness
  – Empathy
  – Compassion
  – Professional behavior
• Model professionalism
• Practice skills
  – Clinical settings – 2 minutes or less
  – Seminars – 30 minutes – 2 hours
Self-awareness
Recognize feelings, judgments

Empathy
Understanding the experience and feelings of another

Compassion
Sympathetic consciousness of another’s distress

Acceptance
Patient is in your care

Quality Care and Communication

- Patient is in your care
- Understanding the experience and feelings of another
- Recognize feelings, judgments
- Sympathetic consciousness of another’s distress
Self-awareness

- What was it that bothered you?
- How did you feel?
- How did you react?
- Do you think the patient noticed?
- How did you talk about the patient to colleagues?
Empathy
What do you think is going on with the patient?

Compassion
Even if you can’t put yourself in this person’s shoes, do you feel that she might be having a hard time?

Acceptance
Can you accept that she is in your care? How can you take care of yourself while taking care of her? How can you care for her professionally?
Empathy

- Empathy is associated with positive outcomes
  - Increased dx accuracy, pt. participation, compliance, satisfaction, quality of life

Neumann, Acad Med, 2011; Shapiro, Phil Ethics Humanities, 2008.
Empathy Decline

• Empathy is associated with positive outcomes
  – Increased dx accuracy, pt. participation, compliance, satisfaction, quality of life

• Empathy decreases in medical students and residents – clinical medicine
  – Increased vulnerability, distance themselves
  – Increased responsibility
  – Increased burnout
  – Increasingly think of patients as “other”

Neumann, Acad Med, 2011; Shapiro, Phil Ethics Humanities, 2008.
What is Values Clarification?

• An opportunity to examine one’s values and beliefs about a specific topic
  – Used in patient decision making

• In setting of abortion care goal is to explore feelings and beliefs so you can better care for women considering abortion
  – Provide high quality counseling and care
Teaching Professionalism Through a Case-based Workshop

Professionalism, Empathy & Patient Care

Case-based workshop

– Part 1: Each participant introduces frustrating case
  • Group selects one or two to talk through
  • Self-awareness → empathy → compassion → acceptance

– Part 2: Clinical cases – specific values clarification
  • Family Planning
Part 1: Participant Cases

Tell us about a time recently when you felt angry or frustrated with a patient...
Part 1: Participant Cases – Common Examples

- Angry patients
- Entitled patients
- Patients who:
  - Don’t take care of themselves – non-adherence
  - Take too clinical much time
  - Do bad things
  - Decline our recommendations
  - Say mean things to us
Quality Care and Communication

Acceptance

How can you take care of her?

What is going on with the patient?

Empathy

Self-awareness

How are you feeling?

Compassion

Is the patient having a hard time?
Part 2: Clinical Cases

• Abortion - perfect for practicing this framework
  – Common in U.S. (>1 million per year)
  – Contentious

• Many judge women for not using birth control, having one (or more) abortion, presenting in the second trimester, or choosing abortion for specific circumstances.
General Feelings about Pregnancy Options

• In general, how do you feel about your patients choosing *abortion* in these circumstances?
  – If the pregnancy threatens her physical health
  – If the pregnancy threatens her mental health
  – If the pregnancy involves significant fetal abnormality
  – If the pregnancy resulted from rape or incest
  – If she is not financially able to care for the child
  – If the pregnancy results from birth control failure

• What are the reasons for your beliefs?
• What surprised you about your reaction?
• It’s okay to challenge students.

General Feelings about Pregnancy Options

• In general, how do you feel about your patients choosing to *place the baby for adoption* in these circumstances?
  – If the pregnancy threatens her physical health
  – If the pregnancy threatens her mental health
  – If the pregnancy involves significant fetal abnormality
  – If the pregnancy resulted from rape or incest
  – If she is not financially able to care for the child
  – If the pregnancy results from birth control failure

• What are the reasons for your beliefs?
• What surprised you about your reaction?
• It’s okay to challenge students.

General Feelings about Pregnancy Options

- In general, how do you feel about your patients choosing parenthood in these circumstances?
  - If the pregnancy threatens her physical health
  - If the pregnancy threatens her mental health
  - If the pregnancy involves significant fetal abnormality
  - If the pregnancy resulted from rape or incest
  - If she is not financially able to care for the child
  - If the pregnancy results from birth control failure
- What are the reasons for your beliefs?
- What surprised you about your reaction?
- It’s okay to challenge students.

Family Planning Challenges

• Three potential scenarios
  – One or more prior abortions – desires another
  – Does not want to use birth control in the future
  – Presents in the late 2\textsuperscript{nd} trimester for abortion

• Hidden Curriculum
  – Challenging aspects of using contraception
  – Systems challenges such as access to care
Why would someone have more than 1 unintended pregnancies? What might be going on in her life?

What upsets you about her having had a prior abortion? How does it make you feel?

Do you think she’s having a hard time? Can you feel for her?

How can you care for her professionally?

Acceptance

Empathy

Compassion

Self-awareness

Quality Care and Communication

Innovating Education in Reproductive Health
You are in a clinic seeing patients with an intern. A 17-year-old woman comes in for a pregnancy test that turns out to be positive. The intern performs an ultrasound, shows her the 7-week fetus, congratulates her and schedules her for a prenatal appointment in a few weeks. She does not mention the options of abortion and adoption to her.

Alternative: She gives biased counseling toward abortion. “You want to finish high school, don’t you?”

What are our counseling obligations?
Resources for Values Clarification and Training

- IPAS
- National Abortion Federation
- Reproductive Health Access Project
- Provide – referrals training

Part II – Tools for Clarifying Our Values .................................................................7

Introduction – Individual Exercises for Values Clarification ................................7

Section A: The Role of External Influences in the Formation of Our Values ..........7
   A.1 – Family and Social Group .......................................................................7
   A.2 – Spiritual Beliefs .....................................................................................9
   A.3 – Life Stage ............................................................................................10

Section B: The Influences of Our Personal Experiences in the Formation Our Values ....10
   B.1 – Sexual Intimacy and Risk-Taking .......................................................10
   B.2 – Parenting, Adoption, Abortion, and Pregnancy Prevention ............12

Section C: Self-Evaluation of Our Objectivity When Considering a
   Woman’s Pregnancy Circumstances and Her Options .................................16
   C.1 – Examining Our Comfort Level with Gestational Age ......................16
   C.2 – Examining Our Comfort Level with Circumstances.........................17
   of Each Woman’s Abortion Decision
   C.3 – Individual Cases: Examining Our Potential Biases .........................18
   C.4 – Pregnancy Options Decision Making ..............................................20
   C.5 – Parenting and Adoption: Examining Our Potential Biases ...............22

Section D: Providing Abortion Care: Professional Values Clarification Exercises ....24
   D.1 – Views about the Role of the Health Care Provider ..........................24
   D.2 – Personal Assessment of Professional Obligations ..............................24
   D.3 – The Decision to Provide Abortion Care:
   Motivations and Obstacles to Practice .....................................................25
   D.4 – Overcoming Obstacles to Providing Abortion Care: A Self Evaluation ....26

www.prochoice.org
Group exercises such as:

- Room is marked as strongly agree to strongly disagree
- Statements are read and participants move
  - Every woman has the right to choose to terminate a pregnancy
  - Parental consent should be required for any teen requesting an abortion
  - Women who have more than one abortion are irresponsible
  - Abortions should be legal only up to 12 weeks of pregnancy.
Provide: Referrals Training

- Project to train health care and social service providers in providing pregnancy options counseling and referral
- Focus on training in making referrals even if individual beliefs conflict with referral
Physicians for Reproductive Health: Counseling Training

- Adolescent reproductive and sexual health education program
  - Counseling videos
- Reproductive needs – short modules
  - Contraception
  - Unintended pregnancy and abortion
  - Early pregnancy loss
  - Counseling videos

Teaching Empathy
Caring for Challenging Patients Workshop (Values Clarification)
Jody Steinauer, MD, MAS
UCSF, Birinyi Center for Global Reproductive Health

This workshop aims to help learners develop skills to manage their own judgmental feelings in patient interactions by encouraging empathy, compassion, or acceptance. It can be used in many clinical settings, including family planning and abortion, and the jail health service.

• Overview and Instructor Guide
• Train the Trainer Presentation

Family Planning Workshop
• Facilitator Guide: Family Planning
• Learners Handout: Family Planning

General Workshop
• Facilitator Guide: General
• Learners Handout: General

Jail Health Service Workshop
• Facilitator Guide: Jail Health Service
• Learners Handout: Jail Health Service

Professionalism Exercise
Angela Dempsy, MD, MPH
Medical University of South Carolina

This exercise was developed as a values clarification exercise for use with interns at the start of their residency training.

• Instructions for Group Leader
• Learner handout
Conclusions

• We should prioritize time for reflection when learners feel challenged by patients.
• We should engage learners in specific discussions about their feelings about abortion, pregnancy options counseling and referral.
